

Study Island Benchmark Assessments

Effectively prepare for your state assessment

All students learn at their own pace, so it's important to know where each student stands on the path to mastering state standards. Study Island Benchmark Assessments provide educators with multiple comparable tests built from the state assessment blueprint. Use these standards-based tests to measure student performance multiple times during the school year to evaluate understanding, check progress, and determine where to focus instruction.

Study Island Benchmarks provide

- Three or four assessments built to reflect your state assessment blueprint, as well as the item types on your state test
- Detailed reports featuring domain, standard, and item-level analyses at the district, school, and student levels
- An opportunity for students to experience a full-length assessment similar to their state test and receive immediate feedback
- An online assessment interface similar to those most commonly used for state assessments
