Hello Everyone,

The first part of the school year is coming to a close already. Time sure does go by fast!

I'm writing to talk about the benefits of having your child ride the school bus.

Riding the bus gives your child an opportunity to socialize with their peers and visit with friends on the way home from school. It can also help save you the expense of fuel and the time involved in driving your child to and from school.

By having your child ride the bus, you are also helping support our Transportation Department. Our funding is based, in part, on the number of students who ride the school buses, so every student who rides makes a difference.

School buses are also one of the safest ways for children to travel to and from school. According to transportation safety statistics, school buses are among the safest forms of transportation.

We encourage you to consider making the school bus your child's first choice for transportation to and from school. Your support helps our students, our families, and our Transportation Department.

If you have any questions, please feel free to reach out to me. I'm happy to help!

Thank you for your continued support!

Tiffani Hermann

Maine Consolidated School

Transportation Director
